- Python / Django

PROJECTS

NextJS, Redux Toolkit, Tailwind **White Board**

🐙 Github

a whiteboard web application using Next.js and the browser's native canvas API, enabling users to draw with various colors and save their work. Implemented various utility features such as undo, redo, clear and download, enhancing the user experience and functionality of the application.

React, Framer Motion **Waves Music-App**

🐙 Github

a music player web app built with ReactJS, using Framer Motion for animations and CDN for song delivery. It lets users, play, pause, skip, and shuffle songs from a library of songs, and shows the song details on the screen

React, Tailwind , Redux Toolkit **Youtube Clone**

🐙 Github

a web app that replicates YouTube's functionality and design, built with React, Tailwind, and various Google APIs. It enables users to search for, watch, and interact with videos from YouTube, with features such as autocomplete suggestions, playback controls and comments.
